

SAMPLE Job Description
Hazardous Area Response Team: Operative
Jan 2011

Position/Title:	Hazardous Area Response Team : Operative
Grade:	
Location:	Trust HART Operational Base
Accountable To: <i>(Job title/s of manager/s whom the member of staff reports to)</i>	HART Team Leader and HART Manager / Coordinator
General Summary:	<p>The HART Incident Response Unit (IRU) works within hazardous areas, to deliver the highest standards of pre-hospital specialist clinical care to all patients actually or potentially affected by any major civil emergency or an accidental or deliberate release of hazardous materials or a chemical, biological, radiological or nuclear agent, whilst using specialist personal protective (PPE) clothing within a Hot Zone cordon.</p> <p>“The Hot Zone is an area within the Inner Cordon where high concentrations of a potentially hazardous substance are present and specific procedures and protocols, including Dynamic Risk Assessments, controlled access and egress and the wearing of appropriate levels of Personal Protective Equipment (PPE) are required. Depending on the type and nature of the hazard this area may contain live casualties who will need to be treated and prioritised for decontamination and evacuation” <i>(National HART Work Standard Operating Procedures v 7.0)</i></p> <p>All HART operatives will be trained in Incident Response Unit (IRU) capabilities. Some will also be trained in Urban Search & Rescue (USAR) skills. USAR Standard Operating Procedures states that:</p> <p>”These areas and incidents are likely to involve collapsed or unstable structures, incidents at height, in confined spaces, or situations where casualties present in locations with difficult access.”</p>

	<p>HART staff will work closely with other emergency service teams at a range of operational incidents including: Major Incidents, incidents of a CBRN nature, USAR incidents, incidents involving hazardous materials, structural collapse, confined space rescue, major transportation incidents, incidents requiring working at height, trench collapse and rescue, incidents involving complex entrapment, inland water operations – as defined and in accordance with HART Standard Operating Procedures, depending upon the qualification and training of the operatives.</p> <p>The post-holder will ensure that the highest level of patient care is delivered in accordance with the procedures issued by the Trust in order to maintain personal safety and that of colleagues and casualties.</p> <p>This job description must be read in conjunction with the standard job description for the clinical role which the individual is qualified to undertake since these and other appropriate duties will be undertaken when not deployed to a HART activity.</p>
<p>Structure <i>(Organisational Structure incorporating two positions above and two positions below)</i></p>	<p>HART Manager / Coordinator</p> <p>— </p> <p>HART Team Leader</p> <p>— </p> <p>HART Operative</p>
<p>KEY RELATIONSHIPS <i>(Add more or delete as appropriate for your Trust)</i></p>	<ul style="list-style-type: none"> • HART Team • HART Manager • Operational Trust staff • Trust's AMLO • Air ambulance services • Fire & Rescue Service • Fire Service USAR teams • Police • British Transport Police • Local hospitals • Coastguard • Maritime Rescue Organisations • Mountain/Cave Rescue
